

WATERFALL FOR IBM MQ

SECURE REPLICATION OF IBM MQ QUEUE MANAGER

IBM MQ uses message queues to transport data and to connect to a wide range of applications and environments. Sending these messages through industrial firewalls introduces significant risks, as all connections through firewalls introduce attack opportunities. Waterfall for IBM MQ enables industrial networks to replicate IBM MQ message queues to enterprise networks, without risk to safe and continuous operation of industrial networks.

The Waterfall for IBM MQ connector software securely replicates IBM MQ Queue Manager servers to enterprise networks. Enterprise users access the replicas normally, without risk to the original OT network. The Waterfall for IBM MQ connector enables businesses to leverage operations data throughout their enterprises without exposing operations networks to cyber risk.

Waterfall's simple installation, configuration and monitoring tools make it easy for users. Comprehensive diagnostics include real-time alarms that alert the user of fault conditions via Syslog, Windows logs, email, SNMP traps, log files, and Waterfall's monitoring console.

BENEFITS OF USING WATERFALL FOR IBM MQ

Secure replication of IBM MQ
Queue Manager

Simple deployment – connector runs
entirely in the Unidirectional Gateway with
simple web user interface

Elimination of remote-control cyber
attacks and online malware propagation

Facilitates compliance with NERC CIP,
NIST 800-82, ANSSI, IEC 62443 and more

Maximum utilization of all IBM MQ features

Power

Pipelines

Rail

Water

Facilities

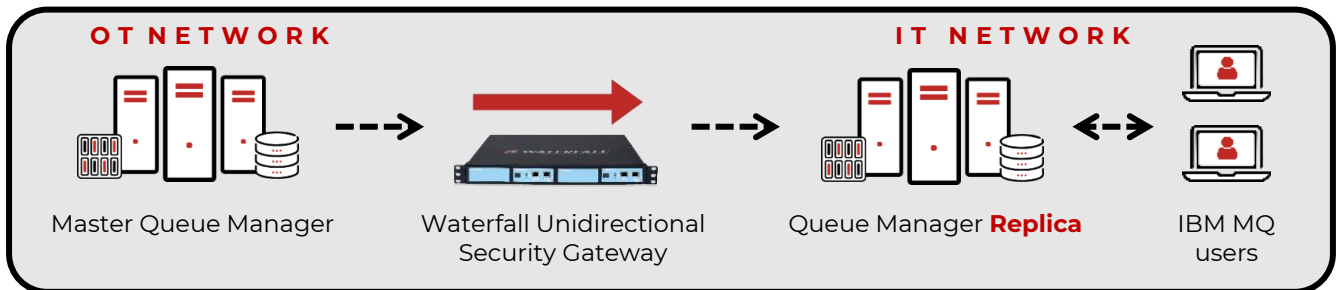

Manufacturing

WATERFALL FOR IBM MQ

The Waterfall for IBM MQ connector replicates in real time a Master IBM MQ Queue Manager, located in the operations network, to a replica IBM MQ Queue Manager located on the enterprise network. Designed specifically for OT security, Waterfall for IBM MQ makes inbound data flows from enterprise to industrial networks physically impossible. Critical operations assets are now absolutely protected against any threats of remote cyber attack, incoming malware or human errors originating on external networks.

Waterfall for IBM MQ communicates directly with the IBM MQ Queue Manager, ensuring the real time replication of alerts, messages and archived messages. With Waterfall for IBM MQ, real-time replication is provided for heavy duty IBM MQ Queue Manager installations with an unlimited number of messages. Users can continue to access and utilize the IBM MQ information originating in the industrial network in real-time while supporting business and operational objectives enterprise-wide, without cyber risk to operations.

FULLY- FEATURED & ROBUST SUPPORT:

- » Filters IBM MQ data based on queue manager name and queue name
- » Supports server and client modes on each side of the gateway
- » Supports spoofing of message headers
- » Optional creation of an archive queue that stores a copy of all messages before they are sent to the corporate network
- » 1-10 Gbps standard throughput
- » Fully transparent to IBM MQ users

ABOUT WATERFALL

Waterfall Security Solutions' unbreachable OT cybersecurity technologies keep the world running. For more than 15 years, the most important industries and infrastructure have trusted Waterfall to guarantee safe, secure, and reliable operations. The company's growing list of global customers includes national infrastructures, power plants, nuclear generators, onshore and offshore oil and gas facilities, refineries, manufacturing plants, utility companies, and more. Waterfall's patented Unidirectional Gateways and other solutions combine the benefits of impenetrable hardware with unlimited software-based connectivity, enabling 100% safe visibility into industrial operations and automation systems.

Waterfall's products are covered by U.S. Patents 7,649,452, 8,223,205, and by other pending patent applications in the US and other countries. "Waterfall", the Waterfall Logo, "Stronger than Firewalls", "In Logs We Trust", "Unidirectional CloudConnect", and "CloudConnect, and "One Way to Connect" are trademarks of Waterfall Security Solutions Ltd.
