

WATERFALL FOR IBM MQ

SECURE REPLICATION OF IBM MQ QUEUE MANAGER

IBM MQ uses message queues to transport data and to connect to a wide range of applications and environments. Sending such messages through industrial firewalls introduces significant risks, as all connections through firewalls introduce attack opportunities. Waterfall for IBM MQ enables industrial networks to replicate IBM MQ message queues to enterprise networks, without risk to safe and continuous operation of industrial networks.

The Waterfall for IBM MQ connector software securely replicates IBM MQ Queue Manager servers to enterprise networks. Enterprise users access the replicas normally and bidirectionally without risk to the original OT network. The Waterfall for IBM MQ connector enables businesses to leverage operations data throughout their enterprises without exposing operations networks to cyber risk.

Waterfall's simple installation, configuration and monitoring tools make it easy for users. Comprehensive diagnostics include real-time alarms that alert the user of fault conditions via Syslog, Windows logs, email, SNMP traps, log files, and Waterfall's monitoring console.

BENEFITS OF USING WATERFALL FOR IBM MQ

Secure replication of IBM MQ Queue Manager

Elimination of remote control cyber attacks and online malware propagation

Facilitating compliance with NERC CIP, NIST, CFATS, ANSSI, UK DfT and more

Maximum utilization of all IBM MQ features

Simple deployment, off-the-shelf solution

Rails

Oil & Gas

Manufacturing

Water

Power

Pharma

WATERFALL FOR IBM MQ

The Waterfall for IBM MQ connector replicates in real time a Master IBM MQ Queue Manager, located in the operations network, to a replica IBM MQ Queue Manager located on the enterprise network. Designed specifically for OT security, Waterfall for IBM MQ makes inbound data flows from enterprise to industrial networks physically impossible. Critical operations assets are now absolutely protected against any threats of remote cyber-attack, incoming viruses or human errors originating on external networks.

Waterfall for IBM MQ communicates directly with the IBM MQ Queue Manager, ensuring the real time replication of alerts, messages and archived messages. With Waterfall for IBM MQ, real-time replication is provided for heavy duty IBM MQ Queue Manager installations with unlimited number of messages. Users can continue to access and utilize the IBM MQ information originating in the industrial network in real-time while supporting business and operational objectives. Enterprise-wide, without cyber risk to operations.

FULLY- FEATURED & ROBUST SUPPORT:

- » Filters IBM MQ data based on queue manager name and queue name
- » Supports Server and Client modes on each side of the gateway
- » Supports spoofing of message's header
- » Optional creation of an archive queue that stores a copy of all messages before they're sent to the corporate network
- » Standard 1Gbps connectivity
- » Fully transparent to IBM MQ users
- » Runs on Linux platform

ABOUT WATERFALL SECURITY SOLUTIONS

Waterfall Security Solutions is the global leader in industrial cybersecurity technology. The company's expanding portfolio of customers includes national infrastructures, power plants, nuclear plants, offshore oil and gas facilities, rail transport, refineries, manufacturing plants, utility companies, and many more. Deployed throughout North America, Europe, the Middle East and Asia, Waterfall products support the widest range of leading industrial remote monitoring platforms, applications, databases and protocols in the market. Please contact: info@waterfall-security.com

Waterfall's products are covered by U.S. Patents 7,649,452, 8,223,205, and by other, pending patent applications in the US and other countries.
